

Positions available on Masonry Structures, Earthquake Engineering and Seismology (PhD students and postdocs)

The Historical and Masonry Structures (www.hms.civil.uminho.pt) at ISISE, University of Minho, Portugal, will be opening soon two positions PhD students (3 years) and two positions for postdoctoral collaborators (4-5 years) on **Masonry Structures, Earthquake Engineering and Seismology** to join an European Research Council Advanced Grant recently awarded.

If you are interested in any of these positions and have excellent academic / scientific qualifications, please send your résumé to Prof. Paulo B. Lourenço (pbl@civil.uminho.pt) until **June 14**.

The positions will address: (1) Study of the seismic action (signal); (2) Shaking table testing of masonry specimens; (3) Numerical and analytical approaches for out-of-plane masonry behaviour.

Please feel free to share the announcement.

Paulo B. Lourenço
