PhD

- Dottorato 1 - Matematica e Scienze Computazionali

And also...

PhD

- Dottorato 1 - Matematica e Scienze Computazionali

Double Degree – Computer Science

This is a Double Degree Agreement, Unipa coordinator Professor Sciortino, signed on 09/09/2015 and renewed in 2020 with [l'Université Gustave Eiffel \(Paris\)](#).

At the end of the course, which requires the completion of at least 30 CFUs at the partner university, students will obtain a Master's Degree in Computer Science in Unipa and the [Master en Informatique parcours Logiciels](#) at the [Université Gustave Eiffel](#).

The mobility lasts six months and is scheduled for the first semester of the second year for Unipa students.

Double Degree – Computer Science

- Since 2015: **20** outgoing and **5** incoming students.
- This integrated study program was one of the three selected in Italy by the **Università franco-italiana** in the context of the 2016 Vinci Award, with a loan for three years. This funding contributes to the mobility, in both directions, of the students participating in this program.
- In 2019, we reapplied for the Vinci Award, and again our integrated study programme was selected and received a loan for three years.

Other agreements, either active or in activation, not in the «Bando di Mobilità Internazionale»

- Some incoming-only agreements are also currently active:
 - **Ukraine :**
 - Borys Grinchenko Kyiv University
 - “V.N. Karazin” National University (Kharkiv - KhNU)
 - “Petro Mohyla” Black Sea National University (Mykolaiv - ChMNU)
 - **Turkey**
 - Other countries for which no outgoing mobility has been recorded in recent years (**Bulgaria, Germany, Lithuania, Czech Republic**).

- A double degree agreement with the University of Cadiz (**Spain**)/Université de Picardie J. Verne in Amiens (**France**) is being finalized for students on the Master in Mathematics.
