

## Seminars:

Monday, March 13<sup>th</sup> 2023, h 15.00

Monday, March 27<sup>th</sup> 2023, h 15.00

Monday, April 3<sup>rd</sup> 2023, h 15.00

Aula B - DIFC, Via Archirafi 36, Palermo

## Seminars “ExoPa” group

## ExoPa Group, INAF – Astronomical Observatory of Palermo

### Titles:

- 1) Detection and physical parameters of exoplanetary systems (**March 13<sup>th</sup>**)
- 2) Observations and modelling of exoplanetary atmospheres and star-planet interaction (**March 27<sup>th</sup>**)
- 3) Lab Experiments and Technology for space missions (**April 3<sup>rd</sup>**)

*The seminars aim to present the research activity of the Exoplanet group of the INAF – Astronomical Observatory of Palermo (ExoPa). The main purpose is to introduce the students to the exoplanet field, a hot topic in nowadays astrophysics, covering the different areas of interest of the group and stressing the wide ensemble of different skills and profiles involved in.*
