

#### Quesiti orale 1

1. Il/La candidato/a descriva la procedura di soccorso istruttorio.
2. Il/La candidato/a descriva quali modalità utilizzerebbe per incrementare il livello di produttività individuale.
3. Il/La candidato/a legga e traduca: "Palermo University has 16 Departments, where researchers study every day to find new solution to the questions posed by nature, science and society. From Information Technology to Biology, from Mathematics to Medicine, to Social Sciences and Preservation of Cultural Heritage, the University works to make its contribution of innovation and progress to the international scientific community and the world of production.  
In the laboratories – many of which are open to the local community – the first step of collaboration between researchers in the academic world and in the business world are taken, basic and applied research is carried out, and young brains are given the chance to turn their intuitions to good account. Here scientific research finds its application in robotics, pharmaceutical industry, ecology, and medical diagnostics. Successful technological transfer implies the full synergy of innovative technologies, scientific expertise, production systems and processes. Actually, it is necessary to implement a full-fledged system including the "know-how", production processes, goods, services and organizational and operational skills".
4. Il/La candidato/a inserisca la schermata di un file excel in una diapositiva powerpoint.
