

Workshop

Technology transfer and commercialization of technologies developed through research.

The case study of the Institute of Low Temperature and Structure Research of the Polish Academy of Sciences

with **Dariusz Hreniak**

17th October 2018

9:30 - 13:30

Consorzio ARCA ed. 16, Viale delle Scienze - Palermo

Programme

Commercialisation paths

CTTIN Techactivity

Examples of commercialised technologies

Summary and Outlook

Institute of Low Temperature and Structural Research, PAS is a research institute of the Mathematics, Physics, Chemistry and Earth Sciences Division of Polish Academy of Sciences.

The institute is EITHealth Wrocław Research Centre, the first research and technology organization in Poland that is entirely focused on the development of innovations, new technologies, and the research reflecting the needs of the modern industry.

EIT has the most comprehensive research infrastructure in the entire East-Central Europe.
