

The Premier Full-Text Information Resource for Engineering Research & Practice

Designed for a broad range of engineering professionals and researchers of all types, *Engineering Source* is the premier dedicated collection of engineering-related content available today.

Engineering Source offers cover-to-cover indexing for over 3,000 publications, including journals, monographs, magazines and trade publications, all directly dealing with engineering-related issues. Energy-focused monographs, books, conference papers and proceedings are also included.

Vital Information for Engineering Professionals

This product provides vital information for professionals involved at any level within the field of engineering, including:

- Research
- Planning
- Product Development
- Management
- Supply Chain
- And Many More...

Providing Unmatched Full-Text Coverage:

This database provides unmatched full-text coverage for nearly 2,000 publications which contain information relevant to many component disciplines within engineering, including:

- Aerospace
- Biomedical
- Civil
- Electrical
- Environmental
- Material Science
- Mechanical
- Software
- Structural
- And many more...
