

Smart Rehabilitation 3.0 Project

2019-1-ES01-KA203-065657

C5 - Short-term joint staff training event on technological innovation in rehabilitation, for adaptation to habitability and use.

From March 21st to 24th 2022

UPC, Barcelona, Spain

The course will allow the participants an exchange of knowledge and experiences, learning from each other, and to debate about how to develop training methodologies and tools on specific topics concerning the technological innovations in rehabilitation for adaptation on habitability and use in Barcelona. Topics that has been considered necessary for future "Building Rehabilitation Experts".

The main aim of the course is an agreement on a common pattern to be applied on training programs for "Building Rehabilitation Experts" in the all partner countries. At the same time, the partners from the different countries will check their own state of the art on the comparative research, orientating and focussing it to the issues emerged during the discussions.

The participants will be selected between experts able to give elements for the debate on the development of intellectual outputs, as extensive research activity and experience.
