Master in Marketing & Digital Management

26th edition

from 14th November '22
to 15th October '23

Under the patronage of

The **Master in Marketing & Digital Management** is a full time program for graduates and young professionals who are willing to undertake a career in Marketing and Digital Transformation.

The **pervasive novelty of digital technologies is changing our lives** as consumers, employees, business operators and citizens at an exponential rate. The way organizations are designed and managed and the way strategies are thought and executed is undergoing a **radical challenge** by the digital technology landscape.

Today's business scenario is driven by such a complexity that societal change and the impact of disruptive technologies are difficult to forecast.

This course provides a comprehensive framework of up-to-date managerial, mental and operational models to design, steer and execute marketing and digital strategies in a volatile and uncertain context.

The Master program provides a unique mix of empirical knowledge and occasions to envision innovative solutions to real organizational problems, stimulating the systemic thinking that is needed to navigate today's corporate environment and professional development.

The Master in Marketing & Digital Management is structured in 6 months of learning activities and 6 months of internship.

The Master in Marketing & Digital Management is organized in 4 modules, covering end-to-end the main aspects of digital transformation

GENERAL MANAGEMENT & MARKETING

The foundational module aims at creating a common language about business and the general management of the firm: strategy, organisations and marketing.

OMNICHANNEL EXPERIENCE

The first specialistic module is based on the tools and methods for the integration of physical and digital experiences from a user-centred perspective.

DIGITAL PRODUCTS & BUSINESS MODELS

The second specialistic module revolves around technology strategy and agile methods to design and deliver innovative digital offerings, such as software products, connected products and data driven business models.

DIGITAL GO-TO-MARKET

The third specialistic module focuses on using digital channels, content and marketing technologies to design customer journeys that lead to conversion.

placement

at the end of the Master

At the end of the Master the participants enter B2C or B2B business contexts, both of industrial companies and of the Retail world.

87% of the participants from the last three editions have found employment being consistent with their training within 6 months since the end of the Master.

Product marketing: evaluating and choosing the best actions to develop a product or service by leveraging new business models and digital platforms.

Communication & PR: designing and managing multi-channel communication strategies to increase the influence of the organization, combining business growth and advocacy activities consistently with brand values.

Trade Marketing: handling the in-store activities of the various product categories. Planning communication and promotion strategies within the store. Overcoming the boundaries between physical and digital stores in the management of products and product categories.

AFTER THE MASTER?

Sales Management: rethinking sales process, managing effectively the relationship with key customers and developing new business opportunities for the company.

Digital Marketing: planning online promotion and measuring online performance and the impact on the company's digital and in-store business. Developing analysis and optimization of messages, tools and budgets.

Market research: analyzing data and trends focused on the market and consumers to define and deploy the best actions for the business and for the product development.

Brand management: building and enhancing the brand with the goal to connect to the customer in multiple places and occasions simultaneously.

strength points

of the Master in Marketing & Digital Management

ISTUD Campus

To fully live the Master experience even beyond the classroom, you can decide to live with other students at the ISTD campus. The flats are in the same building where ISTD headquarters are located and they can accommodate from 2 to 5 people.

ASFOR accreditation

The Master is a specialized and accredited Programme by ASFOR which guarantees the respect of a series of quality parameters in the teaching phase and in the placement at end of the Master.

Networking

The Master is a hub where people, experiences, teachings, relationships and networks - useful for your professional future - converge. You will get in touch with other students and Alumni of ISTD Masters and with company managers. You will have the chance to develop projects together with students from other Business Schools.

Learning Room

You will have access to an online space where you will find the schedule of weekly activities, the training materials, the group and individual work evaluations.

Practice in action

Marketing practices and business cases are the distinctive elements of the Master: an active involvement in day by day tasks and projects proposed by companies. Thanks to this dynamic format and the frequent alternation between theory and practice, you can immediately get in touch with the world of work through highly impact field experiences.

Career Coaching

Through orientation talks, we will help you acquiring awareness of your potential and attitudes to better define your professional goals. We will support you in writing your curriculum, preparing your interviews and evaluating their outcome.

Innovation and Digital

During the Master you will have the opportunity to discover the latest theories, models, experiences regarding the digital environment, the world of marketing, innovation and digital technologies, with some of the best Italian and international experts.

Improve your English

Some lessons of the Master (in the modules of specialization) are held in English.

choose

the first Independent Business School in Italy

Attending a Master at
ISTUD Business School is
a unique opportunity to
enlarge your cultural and
professional background
with a lifetime return

ISTUD is the first independent Business School in Italy.

We design and implement training programmes and projects to help companies change and grow. We help high-potential youngsters to develop and succeed in their job and we carry out applied research on socioeconomic, managerial and health issues.

Selection Procedure

The Master is addressed to graduates from all faculties. The minimum requirement is a bachelor's degree. Graduating students are also admitted to the selection process.

The selection takes place through psycho-aptitude tests, motivational interviews and an English language assessment.

The dates and locations of the selections will be communicated on ISTUD website www.istud.it/mastermktg.

Costs and scholarships

The cost of the Master is € 12,000 (VAT included) and includes all the activities planned during the classroom phase, workshops and educational materials.

Payment is divided into four installments. The registration is formalized with the signature of the enrollment form and the payment of the first installment equal to € 3,600 (VAT included).

There are possibilities of accessing Scholarships and subsidized rate loans.

Where we are

The Master in Marketing & Digital Management takes place at the ISTUD training center in Baveno, on the lake Maggiore.

The venue includes 5 main classrooms and 5 other classrooms for group works with wireless connection.
