

ML cube S.r.l. is a University Research Spin-off and an Innovative Firm providing Artificial Intelligence cutting-edge solutions. It is the result of specific research lines in Machine Learning, Reinforcement Learning, Transfer Learning, Game Theory, Deep Learning, NLP conducted by a brilliant and synergic team coming from Politecnico di Milano.

Who we are looking for

We are looking for a creative, highly motivated and passionate Full Stack Developer to join the Team in Agrigento.

Your Tasks

Design and build high quality, maintainable, and robust AI solutions for our products;

Adoption of best practices in front-end and back-end development engineering: design, testing, version control, documentation, build, deployment;

Collaborate with UX Designers, Product Managers, and Software Engineers to deliver compelling user-facing products;

Build software based on Artificial Intelligence and find innovative solutions for Human/AI interaction.

Candidate requirements:

Master degree in Computer Science and Engineering or similars

At least 3 years of experience in a leading software development role in high profile consulting ICT companies or startups

Excellent attitude to teamwork and collaboration in order to establish an effective collaboration with the internal team members and customers.

Strong objective based orientation and problem solving attitude

Flexibility and autonomy, proactivity, continuous curiosity in the technology evolution

High proficiency in English

Technical Skills:

Backend development: Python, PHP, JQuery and [ASP.NET](#)

Frontend/Web development: HTML5, CSS, JavaScript, React-bootstrap

Docker/Microservice pattern

Cloud computing: AWS and AWS Lambda

Database management: MongoDB databases, relational databases and MySQL

Basic know-how on Linux / Unix shell commands

Nice to have:

Experience in Financial and Banking services

Knowledge of the main Machine Learning techniques and concepts

Experience on Python-based web stack development frameworks (e.g. Django, Flask, Pyramid)

Soft skills

A creative thinker with passion for innovation.

Accurate, responsible, proactive, and ambitious, with strong organizational skills and results-oriented.

Curious and eager to increase your knowledge and skills for your personal and the company growth.

Notes:

Please apply with a cover letter

The workplace will be in Agrigento, with smart working possibility (we provide a company PC).

Employment type:

Full-time
