SEMINAR ON...

«Nursing Process and Nursing Records: Meta-instruments and Care Prescription»

Professor Víctor M. González-Chordá
Universitat Jaume I

May 27th and 28th, 2025

Aula Magna di Igiene, Policlinico Universitario «P. Giaccone»
Via del Vespro, 133, Palermo

In the current context of digital transformation of healthcare systems, the training of future nursing professionals must include key competencies in the effective use of information technologies and evidence-based clinical tools.

This seminar offers a solid foundation on the nursing process and its integration into information systems, as well as on the use of meta-tools such as VALENF, designed to facilitate comprehensive assessment and safer, faster, and more evidence-based care prescription.

By addressing these competencies with a theoretical-practical approach, we contribute not only to the professional development of students but also to improving the quality of care in any clinical setting.

PROGRAM

Theoretical and practical session, 27/05/2025

09:00 – 09:15 Students' registration and greetings from the Coordinator.

09:15 – 13:00 Nursing process and information system.

Theoretical and practical session, 28/05/2025

09:00 – 12:30: Meta-instruments and care prescription.

12:30 – 13:00: Assessment.
