Learn more about EnerNETMob

In this specific webinar the speakers presented projects and experiences from various Mediterranean countries and regions on the uptake of electromobility solutions. Participants from Austria, Italy, the Peloponnese region in Greece, and the Region of Bar in Montenegro presented their activities, challenges, and successful strategies in promoting electric mobility in their respective territories.

**EnerNETMob in Austria**
Mr. Matej Zakonjšek, Director of the Permanent Secretariat of Transport in Austria, presented Austria’s progress in electromobility, focusing on initiatives such as the greening of maritime transport and the installation of charging stations. He emphasized the importance of effective investment policies and the strategic role of electric vehicles in reducing carbon emissions and supporting the transition to a circular economy.

**EnerNETMob in Italy**
Giovanni Carlo Cancelleri, Deputy Minister of the Italian government, discussed the Italian government’s strategic guidelines for promoting electric mobility, including the development of new policies and the establishment of funding mechanisms. He highlighted the focus on sustainable and smart mobility, particularly in the context of Mediterranean cities.

**EnerNETMob in Greece**
The Region of Peloponnese presented its efforts in promoting low-carbon and digitalized multimodal transport, including the installation of charging stations and the establishment of a mobility demonstration unit specifically for logistics in the agri-food sector. The Region has also enriched its charging network, with a target of 33 charging stations by the end of 2021, to support the development of electric mobility in the region.

**EnerNETMob in Montenegro**
The Port of Bar presented its efforts in electrifying maritime transport, including the purchase of electric vehicles and the installation of charging stations. The Port of Bar has made a strong shift towards electrification, focusing on reducing the carbon footprint of maritime transport and supporting sustainable development.

**EnerNETMob in Europe**
Dr. Luisa Graziani, Head of the European Commission’s Joint Research Centre, discussed the role of cities and public authorities in the transition to smart and sustainable mobility. She highlighted the importance of integrating electric mobility with other modes of transport and the need for effective public-private partnerships to accelerate the deployment of infrastructures for electric vehicles.

**Interview with Giovanni Carlo Cancelleri**
In an interview, Mr. Cancelleri discussed the Italian government’s goals for promoting electric mobility, including the establishment of new policies and the establishment of funding mechanisms. He emphasized the importance of effective investment policies and the strategic role of electric vehicles in reducing carbon emissions and supporting the transition to a circular economy.

**Join the EnerNETMob network**
All partners participated to the event to update their progress and next steps. The panel was formed by representatives from public bodies, networks, and SMEs. The session gathered more than 600 public bodies and SMEs, consisting of over 300 physical and digital addresses, to engage in discussions on the European transport Community co-circle.”

**Updates on pilot implementations**
**Key trends emerge from this**

Updates on pilot implementations:

**About the MED Forum**

EnerNETMob meeting with the Director of the Permanent Secretariat of Transport in Austria. The meeting was part of the MED Forum event held in October 2021, focusing on the challenges for sustainable mobility in Mediterranean cities. The session gathered more than 600 participants, including representatives from public bodies, networks, and SMEs, to engage in discussions on the European transport Community co-circle. The meeting was used as an opportunity to introduce EnerNETMob and its goal of promoting low-carbon and digitalized multimodal transport and maritime sector infrastructures of EnerNETMob as well as own funds or European resources towards electromobility during the last 16 October 2021.
