Welcome to the EnerNETMob Startup Day!

In this publication, the latest updates on the activities of the EnerNETMob project are presented. The project, supported by the European Union, aims to promote energy efficiency in the Mediterranean region through the development of renewable energy solutions.

If you are interested in more information or wish to participate in the project, please visit the EnerNETMob website or contact the project team. Together, we can create a sustainable future for all.

Updates on the EnerNETMob project

The EnerNETMob project counts on a broad range of partners from different Mediterranean countries. The project is working towards the capitalization phase, where the results of the project will be disseminated and used to support real-world applications.

In the next months, the project will hold several transnational management meetings, continuing to discuss the future of the project and its impact on the Mediterranean region.

The EnerNETMob project is funded by the European Union, and the project team is committed to ensuring that the results of the project are disseminated to the widest possible audience.

The EnerNETMob project fosters the development of renewable energy solutions in the Mediterranean region, promoting sustainable development and contributing to the achievement of the European Commission's Green Deal targets.

The EnerNETMob project is an example of how collaboration between different stakeholders can lead to innovative solutions for a sustainable future.

Let's work together to make the Mediterranean region a model for sustainable development!
