Health Promotion and Cognitive Sciences

Università
degli Studi
di Palermo

The doctoral program aims to develop innovative and technological skills to promote the health and development of individuals and communities by addressing psycho-physical, cognitive, and social aspects. Research topics focus on the fields of motor and sports sciences, psychology, and educational-pedagogical studies, which are particularly relevant today due to their impact on health, economy, culture, and the formation of human capital. The multidisciplinary and interdisciplinary training project will enable graduates to work in academic, healthcare, sports, and educational settings.

COURSE OBJECTIVES

“ The only way to do great work is to love what you do. S.J.
