

„Week of e-Workshops”

for PhD Students to present and networking

GENNEX „Week of e- Workshops” a series of online thematic events for PhD students will be organised by the INSHS (International Network of Sport and Health Sciences; France) in collaboration with the GSIC Global Sports Innovation Center; Spain) for PhD students and young researchers of GENNEX Hub partner universities doctoral school/programmes.

The program and the themes of the 90 minutes e- workshop will be organised on Zoom can be found below.

The interactive workshop operates like an e- poster session where PhD students have the opportunity:

- to present a 5 minutes PPT (followed by 5 minutes of Q and A) of their research (planned, ongoing or completed)
- to get feedback from the moderator and other academic members of staff of hub partner universities
- to network with other students who have similar research interests

The goal of each e-workshop is to provide a multidisciplinary research approach to key priority aspects of the announced themes of each online event.

The target groups are: PhD students, MSc students, researchers.

There will be a maximum of up to 10 presentations held at each workshop. (In case of more abstracts being submitted for a workshop, we will organise additional event in that theme later.)

The deadline to submit a half-page abstract (optional structure) of the presentation will be **3 days(!) before the relevant e- workshop**. This is important for us to know in advance to plan the workshop agenda. Email to send it: dancs.inshs@gmail.com

We also invite the supervisors of the PhD students to participate as their opinions and feedback about the other presentations would be highly appreciated by the students.

Please ensure that this announcement reaches your PhD students and their supervisors!

Program of the „GENNEX Week of e-Workshops” (on Zoom)
