The DHBW Mannheim

The Baden-Württemberg Cooperative State University (DHBW) is not only the largest university in the state, but also the oldest and most experienced point of contact for career-integrated study programmes in Germany. With over 6,000 students, around 2,000 partner companies and more than 45 specialist courses, the Cooperative State University in Mannheim is DHBW's second largest location.

Studying in sync with the working world

Alternating theory and practice: a career-integrated course of study at the DHBW Mannheim combines academic university studies with professional experience. An extensive bachelor's programme in the schools of engineering, business and health accredited by the Central Evaluation and Accreditation Agency (ZEvA) offers prospective students numerous possibilities for using the career-integrated study concept to achieve their career aspirations – including excellent prospects for the future. After all, technically competent junior staff with initial work experience can join the company immediately on graduation and are in great demand on the job market.

Securing tomorrow's skilled workers together

Together with its corporate partners, DHBW Mannheim provides students on a bachelor's degree course with training for responsible roles in business and industry. Companies from all over Germany send young skilled workers and managers to our university for this purpose. The lively cooperation and exchange which we enjoy means that the companies bring current market requirements directly into the lecture halls. Furthermore, ongoing exchange with other DHBW locations and continuous evaluation ensure consistent teaching quality and young talent for the future.

More than the synergy of theory and practice: helping to shape the future

Our productive university life is also characterised by a dynamic project culture and innovative research activities. Students, lecturers and companies work together to find solutions to academic questions. Centres of expertise and a comprehensively equipped laboratory complex offer a modern framework in which to achieve this.

* The classes have a maximum of 35 students!
* You will have close contact with the teaching staff!
* The teaching staff has a strong practical reputation!
* You don't need to speak German to study, the university has a big variety of classes offered in English!
* Additional German classes and other foreign languages are offered!
* VISUM e.V. will organize a Buddy Programme with German students for you!
* Trips to various interesting places in the Rhein-Neckar region and all over Germany are organized each semester!
* They will support you in finding an internship!
* They organize pick-up on arrival!
* They organize student accommodation placement and provide a free service for liaison with the housing company!
* After your arrival the university provides academic and non-academic support!
