# Software Developer - Internship

## Software Developer – 3III`s

We are looking to expand our IT Team through a diverse set of people who will work alongside other experienced developers in a supportive environment and gain exposure to a broad range of technologies during 6 months` internship. We have been working on the company`s infrastructure based on a core platform of Microsoft SQL, JAVA, VB, and Groovy. This architecture integrates in real time to Business Object Visualization systems.

This is an excellent opportunity for a bright, talented technology enthusiast to contribute to both short and long-term development projects.

We have a very strong aggressive roadmap (SCRUM) to speed up the rollout of our strategy by expanding our core team.

## Areas of Platform work

•Tailored Portals for Clients, Management & Employees.

•Mapping & GPS Realtime Systems

•Shopping Based & Resource Planning

•Paperless System

•Metric & KPI Dashboards (RTS)

•Automated Response Events based on text, email and voice platforms

## Desirable:

- Experience in SQL using Microsoft SQL server 2000/2008.
- Front-End: Html, CSS, Java Script, JQuery, ajax.
- Server side: PHP, Groovy,
- GPS / Geolocation and Tracking System
- Worked with Intrexx Platform
- Real-time Data Visualization systems and Dashboards

## Compensation & Benefits

•**Accommodation (All Inclusive)**
Executive Professional Suite Located in Central Swindon, fully furnished with all amenities catered for,

- SKY Premium TV
- WiFi Access

•**Gym Membership**
- Fitness Suite
- Pool
- Fitness Programs

•**Powered Bikes**
3III`s promotes a smarter and healthier lifestyle. We provide a bike for the use commuting to work.

•**Company Events**
Interns guarantee a fresh and young environment. 3III`s encourages people to interact and have fun and that starts with our team! From an in-house "Google room" to exciting events, we are a hugely social company that aims to create the perfect balance between work and team-building.
