Mathematical formula for converting the high school mark achieved abroad.

Results with any decimal numbers shall be rounded off to the nearest unit:

$$\text{Mark} = \frac{V - V_{\min}}{V_{\max} - V_{\min}} * (I_{\max} - I_{\min}) + I_{\min}$$

V= Mark to convert

V_{min} = minimum pass mark in foreign schools

V_{max} = maximum pass mark in foreign schools

I_{min}= minimum pass mark in Italian schools (= 36/60) for high school graduation from 1968/1969 to 1997/1998

I_{min}= maximum pass mark in Italian schools (= 60/60) for high school graduation from 1968/1969 to 1997/1998

I_{min}= minimum pass mark in Italian schools (= 60/100) for high school graduation from 1998/1999 to date

I_{max}= maximum pass mark in Italian schools (=100/100) for high school graduation from 1998/1999 to date

Qualitative marks should be converted as follows:

Foreign mark	Italian mark from 1998/1999 to date	Italian mark From 1968/1969 to 1997/1998
A	100	60
B	90	54
C	80	48
D	70	42
E	60	36

For qualifications awarded with no mark, the minimum pass mark, corresponding to 60/100 should be used.
